“Victory Plants,” The Prestige Strain of Michigan-grown Nursery Stock

BLACK-CAP RASPBERRIES — Who doesn’t like them? We have two million plants for sale.—RED RASPBERRIES

OUR SPECIALTY—Fine Strawberry Plants and Satisfied Customers.

A Common-Sense Catalogue.

OUR NEW YEAR SALUTE.

A NEW YEAR! We believe it will be a record-breaking year for everyone that fills the soil for a living. Especially do we think so for the fruitgrower and gardener. At any rate, we are very optimistic — like to look for the bright side of everything. Every black cloud has a silver lining, and fruitgrowing for the next few years should have the brightest of all.

We trust that these few friendly words respecting business shall not be out of proportion to the quality of our nursery stock and the confidence you have in our business service.

We have the best crop of Strawberry plants, Raspberry bushes, Currant bushes, and Grapevines that we have had for several seasons. The yield in other items in the nursery line are a fair average. We believe that our customers will all set a liberal acreage this spring, set with “Victory Plants”!

This small common-sense catalogue may seem a small and unworthy salesman, but let us kindly impress upon our friends and customers that you may compare our catalogue and prices, but the business conclusion is to compare our stock and service.

Our resolution is that there shall not be a dissatisfied customer this season. If there is it will be your fault, that you do not tell us. No pains, no kindness, nor expense at time of shipment will be spared to make “Victory Plants” please you.

It is true, our common-sense catalogue is not overdrawn, but as brief as possible, to save paper, time, and space, but it will tell you reasonably well just what we have to sell.

We appreciate the increase of business from our friends and customers that each year has given us, and trust that we may merit a continuance of your patronage, the same as in the past, for our Victory Plants must please you.

Very truly yours,

J. G. PRESTAGE, Proprietor.

VICTORY PLANTS AND TREES

SHRUBS LIKE THIS HELP TO MAKE A HOME ATTRACTIVE.

-rotated and fertilized. Plow deep, narrow well, and level with a roller before setting.

Use a spade to make an aperture in soil large enough to insert roots of plants up to level of crown of plant. Firm soil around plant and begin cultivation in five days at most, sooner if possible.

Your agricultural college can give you the best advice on growing strawberries, but we will gladly advise or assist in any way anyone who will write us.

ARRIVAL OF STOCK — Set immediately. We can’t be blamed if plants are kept sitting about after arrival, and not set out. Set at once, but if impossible, heel them in damp earth by cutting the bands around each bundle and covering with moist earth up to the crown of each plant.

The understanding that “VICTORY PLANTS” must please.

GREATLY REDUCED PRICES.

You can this year buy our guaranteed healthy, vigorous, and productive VICTORY PLANTS for the same prices usually charged for plants of uncertain quality and productiveness. Favored with a splendid growing season this, together with our enormous production, has lowered the initial cost per thousand plants. The benefits of this great saving are yours if you buy VICTORY PLANTS at our reduced prices. Plant the BEST and be certain beyond a doubt that the firm to whom you entrusted your order can and will provide you with such stock.
(S) and (P) VARIETIES.—Varieties of Strawberries marked (P) are plattist (P) imperfex, blossoms and need be set near (five to 15 feet) to some variety marked (S) which has staminate or perfect blossoms. The staminate varieties have pollen to spare, and thus pollinize the imperfex blossoms and insure a good crop. Varieties marked (S) need not have (P) varieties near them, but (P) varieties must be set near staminate varieties.

SHIPTMENT.—The general way of shipping plants and trees is by EXPRESS. The rate is one fifth cheaper on plants than on other articles. Purchaser pays all express charges. It is many times convenient to have plants sent by express so when the customers live out of town, as 50 pounds can now be sent anywhere by post, 70 pounds in first three zones. When plants are ordered by post, we will use express in order and postage can be returned to us. This method is the safest, cheapest, and the plants will be in the best condition when received.

TERMS OF SALE.—Cash with order; or one third with order, balance before shipment. If we can accommodate you in any other way, let us know.

CLAIMS will not be allowed unless made within five days after receipt of plants. We notify all our customers the date upon which plants are shipped by express.

PLANT AND TREE GUARANTY.—Our nurseries have been inspected by the State Inspector of Nurseries and all nursery stock found to be in a healthy condition — free from disease and insect pests. We guarantee all roots and plants sent out to be exactly as described in this catalogue and true to name.

Every customer is entitled to receive, in good condition, sound, healthy plants. We will replace without charge any plants which do not reach the purchaser in good condition or that is not free from insects or disease, provided we are notified within five days of arrival of the plants and such stock is returned in and held subject to our disposal. Unless a customer reports within five days after receipt of plants it is understood that the plants arrived in a live and healthy condition. It is not our fault if the plants fail. The life of a plant after it reaches the planter depends upon conditions over which we have no control.

The chief causes of failure after stock is received are: Drying out in the sun or wind, if not shaded; freezing in the cold; failure to properly prune the tops; crowding the roots into small holes cut out of the sod; planting in worthless soil; the use of too much fertilizer or placing of manure or fertilizer in direct contact with the roots; draining the soil firmly about the roots; drains; dogs; pests; children; heat; cold; accidents; wrong locations; lack of moisture, and lack of proper care and attention. No fair-minded customer would ask for replacement when failure to grow is unquestionably due to such causes, but when the mass of failure is unknown and the customer reports loss by August first following planting, we will replace such stock at one half price.

Our methods of propagation and handling stock insure to the greatest extent the true labeling of our plants. It is mutually agreed, however, between the purchaser and ourselves that we are to be held liable for not more than the purchase price if any error should be made.

We absolutely protect the purchaser. Our guarantee is one that always guarantees; it is a guarantee that will hold water. It is more than idle talk. It means something. It is tangible, collectable assurance that you are spending your money wisely. There are no loopholes in this guarantee. It is in every way binding on us and means just what it says. It is the best protection to the planter.

If you want the genuine everbearers, place your order with us and get high quality, true to name stock.

SUPREME (S)—On ground Supreme is still one of the leaders of all fall varieties, being one of the first fruits to ripen; it is the best for forcing, as it is productive in quantity and quality, as well as for sale. The berries grow much more regularly in shape and size at all times of the year. They are large and average in size; they will produce a big crop of large, choice, high quality, productive, good中国汽车 producing qualities of Supreme. It seems almost unbelievable that after producing a crop of fruit the first fall after being planted, they will also produce as large a crop in the following spring as any of the others. We find this absolutely the fact, and, besides, they will produce another crop following that of the fall, and the profit of the plants is more than the cost of plant and soil, in the opinion of the.Progressive. We know you will be pleased with the Supreme, and are disposed of them. The berries are large in size, rich in color, and deliciously aromatic in flavor. They have handsome green caps which make the fruit stand out exceptionally good in the judge. This is one of the best June bearers.

JUNE BEARING OR STANDARD VARIETIES.—Aroma (S)—A combination of the finest late strawberries and the only late one grown in much of the strawberry-growing sections of the Northwest. The berries are large, and the plants are strong, healthy growers. However, the fruit can be had by planting for hill culture and keeping runners removed. We have a large acreage of Aroma this year but, as stated above, we set only a few plants and as we have not had a very heavy time, we will sell out early. It is one of the best June bearers.

PRIZE-WINNING BOX OF PROGRESSIVE EVERBEARING STRAWBERRIES

The above box was ever issued by a responsible house. Demand this guarantee wherever and whenever you buy.

STRAWBERRIES.

FALL BEARING VARIETIES.

So much has been said and written about them that the following is enough to be said here. We have grown them nine years. They are a decided success. This wonderful new race of strawberries has come to stay, and are appreciated more and more as they are grown each year. They require rich soil and good care. If you only want the best varieties, I have tried nearly everything that is new and curious about them, and have made my finds to six varieties of this sort. You will make a mistake if you do not see some of the Everbearing. The berries somewhat resemble the old-fashioned strawberries in shape, size, flavor, and productivity. Nothing can be said against it unless that poor soil and improper cultivation will it, toward the latter part of the season, run a little small. All Everbearers should be picked off immediately after setting, until July 1, or possibly the middle, after which they can produce their fall crop.

Champion—This new everbærer was introduced about seven years ago, and has been quite extensively planted by fruitgrowers in the Public Sales of the Southern Michigan State Experiment Station at the request of the state boards of agriculture of all the states. It has been very similar to the Progressive, but has saved many of those who have fruited it here, it has proved to be a much better plant maker, both in quality and much more productive, three mighty good reasons why you should plant the Champion. Its color and firmness are very similar to the Progressive, and some growers say it is larger in size and will produce more, even in poor soil than the Progressive. We know you will be pleased with the Champion, should you obtain it.

Big Late (Kellogg's) (S)—Same as Big Joe or Joe Johnson—this stock was sent to the United States from the introducer, so we have them absolutely true to name. We fruit it last year and think so well of it that we intend to plant it largely for fruit this season. The berries are super fine in quality, color, and size and are bright, glossy; red, and are one of the best varieties we have ever had. They will ripen in late August and will make a good plant with ample soil and plant and soil and plants which are as far from trees, dark red in center, and so rich in sugar and essential oils that it will remain sweet and firm for over a week after ripening. It is a large, healthy, well-balanced plant of the multiple crown type. Medium late.
GREG BLACK RASPBERRIES ARE MONEY-MAKERS.

Collins (S) — A very heavy grower of beautiful foliage, healthy, and makes just about the requisite number of plants. It is a mid-season to late variety that has a very long season. It will stand much frost as any variety grown. Its intro- duction by V. R. collagen has always been considered the best, and it is one of my favorites. It is a fine and a wonderful shipper.

Eaton (S) — Wonderful revelations are claimed for this variety. This was introduced and is being extensively advertised by the same grower that introduced Collins. He claims it is wonder- fully large in size, ex act ant in color, flavor, and all the qualities that go to make the greatest and most valuable strawberry ever introduced. He is a very trustworthy man and I do not hesitate to recom- mend the berry as all he claims for it. Growth of vines is supreme in every regard. A heavy crop of large berries, even the darkest red, so it must be a superior canner.

Cooper (S) — Our supply of these is limited, but came from the most reliable sources. It is in large size, a prodig- ious yeilder of beautifully colored berries. As a shipper, more is no better. Big and late. We have never failed it. So read what the other fellow says. "It looks good to us, and we are sure Cooper will please us.""—Senator Dunlap (S) — Midseason. Greatest all- around berry ever introduced. More of this va- riety planted than any other. Bears heavy crops of bright red, delicious flavored fruit. Of regular shape and size, always juicy and sweet; firm and one of the best shippers. Equally good for home use. Same as Dr. Jurrill.

Bunch of Niagara Grapes.

Woodruff's Bed — A very desirable, large, red grape of good quality. Campbell's Early — Early enough to bring in the first grape money. Needs good soil. Large berry and cluster. In demand.

GREAT BLACK RASPBERRIES ARE MONEY-MAKERS.
**Niagara Cuttings — $1 per 100, postpaid; 1,000 for $80.**

Moore's Early — Another fine, early, black-purple grape; a little earlier than Concord; re eminent for its size, color and flavor; good, but not so good for table as Concord.

*New table for prices.*

**Brighton** — Probably the most popular red grape in Illinois, being noted for its beauty, large berries, and general appearance.

**Lindley** — A very good variety, with fruit that has few seeds.

**Pokkington** — A very highly prized new grape of excellent quality and high price.

**Sea-sim** — You should include this in your collection.

**Eaton** — Another new grape that is attracting attention and setting records.

**Ives** — New, profitable, liked, hardy.

**Grape Cuttings** — We can supply you with grape cuttings of these varieties at reasonable prices as follows: Concord, or Wurden at $1 per 100, $4 per 1,000; Moore's Early, Delaware, $5 per 1,000.

Set Grapes for Profit. Let us sell you the vines we are probably the largest grower of grapevines in Michigan and are supplying many of the large nurseries with vines. Buy directly from the grower.

Buy from us and save money. **"VICTORY VINES**" win. We can sell you one vine or a hundred, which you can profit by, and tell you tales of magnificent profits from grapes, as some nursery men are doing, but for the past few years we have not found it necessary to do so in order to sell vines. If you are very much interested, write us and we can send you addresses of hundreds.

**CURRENTS.**

There is good money made growing currants. There is a demand of the characters that can be sold at a good price. They can be sold quite readily and bring a good price. They can be sold at a good price. There is a demand for currants all the year round.

**Perfection** — The new prize currant, large, productive, hardy, and profitable on a market basis. The markets in the cities are seldom supplied with the best currants. We offer the best varieties only. Most profitable of all currants.

**Black Nashe** — Best black, large, good, and popular — quickly becomes a winner. Price is always good.

**Wildier** — Medium-size, red currant, but one of the best red currants. Requires rich soil, but is not hardy and vigorous a grower as some, which is the only fault it has. It is one of the best red currants.

**London** — Grow one of the best red currant varieties. For the heaviest bearer of exceedingly juicy and palatable fruit. When picking you can literally take them in. Records have been made of 500 pounds per acre in the fruit belt, growing London Market, large, hardy-growing bushes.

**White Grape Currant** — Best white. Large pulp, juicy, sweet, slightly acid. Good for all purposes, and will make a profitable market currant. You will have no competition in growing a field of white or black currants.

**Eag's Currant** — A currant that is perhaps a little larger than London Market. Stems of fruit are large, berries uniform in size and easily picked.

**GOOSEBERRIES.**

For several years the demand has been unsupplied, and the price has been high. There are many varieties, but none have succeeded anywhere and are free from disease. They are really the only profitable pulse.

**Houghton** — A vigorous grower of reddish berries when ripe, fine flavored, the heaviest yielder, and excellent wherever; the easiest to grow; not so large as Dowling.

**Dewling** — Fruit large, greenish white, free from disease; hardy; color not so large as Houghton, but stouter and slower of growth. A good bearer and a favorite berry for the market. All gooseberries thrive on strong soil; clay loam, well drained, is good, but Dewling needs the rich- est soil of all and plenty of manure and coarse straw to insure success.

**DEWBEERRIES.**

Considering the enormous yields and big profits realized by growers of dewberries it is surprising that they are not more generally and extensively grown. Dewberries are twice as productive as blackberries. They are on the market when fruit is scarce and consequently command big prices. Dewberries are twice as productive as blackberries, the fruit is larger, sweeter, of better quality, the best, making them equally desirable for home use or market. Dewberries grow from five feet and other furs and diseases, and a field of them will produce big cropping plants for a number of years.

**Luceria** — We recommend the Luceria as the most productive and most profitable Dewberry. It is a good grower and produces an enormous amount of fine fruit regularly. The berries are large, jet black, flavor and quality of the very fine. Can plant Luceria with full assurance that it is the very best of the Dewberry family.

**ELDERBERRY.**

**Adams** Improved — A new fruit, perfected from the common elderberry. Everyone likes elderberry plum, jams, wine, etc., but the only way to get these in season has been to chase the dusty roads of fields. This is an improved variety, the berries of which some times measure nearly one third of an inch in diameter. The berries are not only larger but finer in every way than the wild variety. Try them.

**FOR THE PAST TWO YEARS SMALL FRUITS.**

Such as grapes, June-bearing strawberries, currants, etc. snaps. The modern era has seen a marked increase in the cultivation of June-bearing strawberries and in the demand for them.

**Everbearing** strawberries have met with a steady increasing demand and a uniform and profitable price, which will continue to be more reliable in Columbia — This is the best purple variety; hardy, has large red and black. Profitable to grow. The best pie and canning raspberry grown. Out-yields them all.

**Cuthbert** — Red; king of the market; large, meaty, attractive, prolific; of size quality; very hardy; none better.

**King** — Extremely early, prolific variety of much value; one of the best known to our country. Grown on the Missouri River.

**St. Regis Everbearing** — Popular everywhere as good as Cuthbert in this country; always produces more than a half a crop in September of fine large berries of good quality. In greater demand than any other raspberry.

**Golden Queen** — Yellow raspberry. Very much desired as it is yellow, it is valuable in addition to the raspberry family. Good in every way.

**Dewberry** — A very nice addition to the garden.

**ASPARAGUS.**

Vo farm nor garden is complete without it; and truly it is very little trouble or expense to raise. Prepare a small space of ground anywhere; but if wanted early, in some spot sheltered from north and west winds. Work seeds deeply, fertilize well with manure or fertilizer, and set in rows 18 inches apart in the row. The space between the rows should be three and a half or four feet, if to be cultivated by horse. Keep up an entirely clean cultivation. Fertilize once per year, but shoots at 2 to 6 inches in height. Set out asparagus bed this fall and in the spring. Asparagus is a hardy, but tender variety, and in the house in the fall. The market for asparagus is small. They will perish as other varieties and are only offered. Two-year roots are better than one-year asparagus. It is a little more expensive, and produces quick and most abundantly.

**Wood's Improved Palmetto** — A very desirable as a variet, superior in size, yield, quality. Very well adapted to the soil and climate of the Atlantic states. It is a hardy variety and will require careful attention to its cultivation. It is a prominent feature in the market.

**Giant Argenteuil** — A very desirable variety, superior in quality, to the other varieties of asparagus. It is a hardy and thrives in any kind of soil. It is a very desirable variety, and its production is equal to any other variety of asparagus. It will keep well in the market.

**Eldorado** — A very desirable variety, superior in size, yield, quality, and resistance to diseases. It is a hardy variety and will require careful attention to its cultivation. It is a prominent feature in the market.

**Shore** — A very desirable variety, superior in size, yield, quality, and resistance to diseases. It is a hardy variety and will require careful attention to its cultivation. It is a prominent feature in the market.

**Fruit** — A very desirable variety, superior in size, yield, quality, and resistance to diseases. It is a hardy variety and will require careful attention to its cultivation. It is a prominent feature in the market.

**THEM,** the best asparagus. We offer the finest varieties of asparagus. We offer the finest varieties of asparagus.

**ASPARAGUS.**

*The Department of Agriculture at Washington is the best in the world; and the Department of Agriculture at Washington is the best in the world; and the Department of Agriculture at Washington is the best in the world; and the Department of Agriculture at Washington is the best in the world.*

**BLACKBERRIES.**

**Eldorado** — At the head of the list, where it belongs. None of these blackberries are quite as good as Eldorado, or even close, and it is a better berry.

**Shore** — The best blackberry, not large, but good, and good in every way.

**Blackberry** — A very desirable variety, superior in quality, to the other varieties of blackberry. It is a hardy variety and will require careful attention to its cultivation. It is a prominent feature in the market.

**Snyder** — An old-fashioned berry that is good and has many friends.

**Blackberry** — A very desirable variety, superior in size, yield, quality, and resistance to diseases. It is a hardy variety and will require careful attention to its cultivation. It is a prominent feature in the market.

**Eldorado** — At the head of the list, where it belongs. None of these blackberries are quite as good as Eldorado, or even close, and it is a better berry.
HORSEBADISH.
We offer the Large Improved Dishman variety. It is best kept for market use. Some very handsomely pruned by growing horseradish, or for seed. Nor hardy, for pruning, and also for sale for many years the profits are in potatoes.

SPECIAL OFFERS FOR 1924.

For $2 we will send post paid, 100 Everbearing and 100 ibison or Duisap. Everbearing, 15 fine Concord grapevines, or you may have 20 smaller ones for $1.

100 large Asparagus roots, post paid, for $1. Also 5 mailing size Spirea Vaugnvillei, post paid, for $1. 12 loseh hundreds of $1 post paid, for 5 beautiful Virginia Cedar, post paid, $1.

100 Miori cberry fruit, post paid, for $1. 50

EVERGREENS.

—_Evergreens—They give as much beauty to the garden as any of the trees, and in fact but little less so, for, if we have the care to get the trees, they will pay for the cost of the trees.

—_The Evergreen Eternal_—best of them all for beauty, size, quick growth, hardiness, and beauty of form. There are 6 inches, 50c; 10 for $1; 12 to 18 inches 75c each 10 for $7.50.

Hemlock spruce (or just Hemlock)—One of the most beautiful grown. Light green, feathery, a good grower. Tri, big for market and home

Red Cedar—Will grow in shade or on very poor land or rocky sandy soil; it is very thorny and has 3 to 12 inches, 40c; 10 for $1; 12 to 18 inches, 50c; ten for 25; 18 to 24 inches, 75c; 50 for 10.

White Pine—The distinctively American pine, the most useful: pine grown—quick grower—easy to grow; 6 to 10 inches, 25c; 12 to 20 inches, 50c; 50 for $3; 100 for 50.

Colorado Blue Spruce—_The lawn spruce_; very dark blue, hardy, grows anywhere, and in any soil. It is valuable both as an ornamental tree and as a money maker. It is a shade tree, and is very hardy, and will grow in any soil.

Scotch Pine—A fast grower, often growing one to two feet in one year. It has beautiful evergreen foliage, making it desirable and attractive. 8 to 10 inches 75c; 10 to 12 inches, $1; 12 to 15 inches, 90c; 15 to 18 inches 75c.

DWARF MOUNTAIN LIMET.—For close borders or for use near the house. It can be had at a very cheap price.

Jack Pine—A native of various parts of America where it grows wild. It is a beautiful tree, sometimes taken for Yallow Pine which it resembles: 10 to 12 inch, 75c; 12 to 14 inch, 90c; Ponderosa Pine—Very similar to Jack Pine, only more beautiful, hardy, growth resistant; has long peduncles—very ornamental; ripe, 4 to 10 inches, 50c; 10 to 16 inches, 75c.

One of the most useful of the Evergreen family—a beauty, hardy in all the north and distinct from other Evergreens, being much planted 9 to 6 inches, $1 each.

Osage Juniper—Very strikingly pretty; liked, but not as hardy as some, 8 to 10 inches, $1.25.

Balsam Fir—Shouldn’t miss this one; a robust grower; a distinct green color of its own; very hardy; 6 to 8 inches, 75c each.

Chinese Arbor Vitea—Not so hardy as some, yet over most of United States district and valuable; 8 to 10 inch, 1.25 each.

Eve Pine—Very much used in England, and also in the United States. It grows quite fast and is useful for almost any purpose, 4 to 5 inches, 50c; 5 inches, 75c; 7 inches, $1.

If several of a variety are wanted of the rarer varieties, write for prizes.
**LEADING HARDY PERENNIALS.**

Live out of doors without protection—as hardy as grass. They were the pride of our grandparents' gardens.

- **Japanese Ironweed**—100c each; 6 for $1.
- **German Iris**—15c each; 6 for 75c.
- **Lavatera**—50c each; 100 for $5.
- **Shasta Daisies**—25c each; 6 for $1.
- **Gentian**—25c each; 6 for $1.
- **Peony**—25c each; 6 for $1.
- **Golden Glow**—15c each; 5 for $1.

**SHOW DAHLIAS.**

- Double Red, per tuber 75c; five tubers 375c.
- Double Pink, per tuber 75c; five tubers 375c.
- Double Yellow, per tuber 75c; five tubers 375c.
- German, all colors, 15c each; 10 for $1.

**HARDY CHRYSANTHEMUMS.**

The making strong flower—Each 25c; four, 75c.

purple-
Superb—Probably the largest flower of the old-fashioned variety. SLatey, and gorgeous and it is also an early bloomer. Has a dark shaded throat, but flared and open. The color is a very deep, rich red. Price each, 7c; ten for 60c.

Fire King—The finest and most improved Paeony. It has long been a favorite of those who grow Paeonies, and a good half dozen immense blooms open at the same time. Its color is intense red, and very attractive. Price each, 15c, six for $1.

Heaven—Blush white, striped crimson. A very pretty and delicate flower. Very few have ever been able to produce an abundance of it. You will be glad to spend a dollar for six.

Mixed Gladols—A large mixed collection of the various kinds and varieties of Gladol, preferring to get a good selection of mixed colors. I keep my mixture full and do not confine to one color or variety, and as a rule, you will please you. There are all the colors and varieties given in the descriptions above in mixed lots, and you will find the only way to buy. I am sure you will be pleased. This is our special 15c for 5c, 35c for $1.

DAHLIAS.

Dahlias are one of the most beautiful of flower creations. Perfect, bright, clean, really cheerful. They are beating the roses at this time. Note our reduced prices. We wish every customer to start a bed of dahlias.

Bed Wind—Showy, bright red, very attractive. Lasts almost indefinitely as a cut-flower. Your collection is incomplete without it. Price 15c, five for 50c, 12 for $1.

Dorothy—Each stem has its exquisite form and delicate shade makes it the most loved and attractive flower of the season. Price 25c each, six for $1.50.

White Swan—Snow white. A beauty, "As sure as drifting snow." Double. Price 15c each, $1.

Victoria—Double, golden yellow, handsome. 10c each, 6 for $1.

Michigan Beauty—Red, double, large, rich glowing boucl of beauty. Appeals to everyone. Each 15c, 6 for 75c.

The Queen—Variegated. Your list would not be complete without this. Price 15c, 6 for $1.

Bed of Blooms—Order of 6f each, of the choice varieties, in any color, at a cost of 15c each, 6 for 75c.

Mixed Dahlias—Here is where you get your full value. A mixture of the most perfect and choice kinds. This mixture contains the above sorts and others. Can not guarantee colors of flowers. This is your best buy. We will please you. Everlasting, also for the past three years has been. This is our Special of Each 15c, six for 50c; 15 for $1; large clumps $1.50.

PEONIES.

The peony is with the rightest and the noblest at the same time the prettiest and most harmonious member of the luxurious, hardy outdoor flower. They increase in beauty and效力 with every season. You can see a bed of a dozen fine peony plants that was not someone's pride and the talk of the community. Since the peony is offered only, will give hands of gorgeous blooms Start your own bed now. We offer only the finest flowering.

Felix Crouse—The most popular red Peony A profuse mid-season. It is known as the best pink color, finishing velvety red, fading to lighter shades; 60c each; 3 for $1.50.

Pestia Maxima—Pure white, very large, fully double blooms; petals are very broad, plant is vigorous. One of the best and most showy. Very large. Price each 35c, six for $1.75.

Dunham—One of the very best. The flowers number hundreds of immense carmine-pink blooms in a very graceful manner. It is very late and very hardy. Price each 40c, six for $2.

Andre Laurant—Very late, solid red, healthful, robust grower, showy and healthy; always popular. Price each 40c, six for $2.

Francis Ogilvie—Produces a heavy load of large, deep crimson blossoms that attract and please the most discriminating eye. The plant grows large and strong. Price 35c, six for $1.75.

New Paeony—This is the famous Decoration Dr. Paeony. A beautiful, bright, clear pink with all very rosy red. blooming by Decoration day. Price each 40c, six for $2.

Queen Victoria—The old-fashioned white that everyone likes. Great in every way and hard to beat. Price 50c each, or 12 for $5.

Prices quoted on all Paeonies are by express or without plants, shrubs, etc. We can ship express by any route, or by rail and express or ship to other cities, enclosing $5 each or 25c for six to pay postage.

PEACHES.

Eberta—Have you ever seen the head of the list waste it beaus, as the most productive peach in the world. The fruit ripens in summer and is good for this time of year. Price 50c, six for $3.

Ehret's Golden—One of the earliest, and one of the most productive. Price 50c, six for $3.

Ehret's Supurma—A peach the size of a hen's egg. Price 50c, six for $3.

Ehret's Yellow—One of the earliest, and one of the most productive. Price 50c, six for $3.

Peaches—are in good supply. We are shipping them as fast as possible. Price 50c, six for $3.

CRAB APPLES.

Hyslop—Fruit large, produced in clusters; rich, red, very hard and vigorous. Best to set for market.

Transcendent—Taking the United States over, probably the best Ruslan Mulberry. The fruit leader. Very hardy, easy to grow, young bearing. Price each, 7c.

PLUMS.

Price of all plum trees, 4 to 5 feet, 90c each, 3 to 4 feet 75c each, ten for $7. Best varieties only.

Lambard—Best commercial and home-use plum grown; prolific bearer; fruit of a reddish purple, smooth, large, and sweet. Price 75c each.

German Prune—An excellent plum, fine for market purposes, all-purpose, early, hard, prolific, young, bearer, popular all around.

Gage—There are different varieties of this plum but are good; fine flavor; yellowish green, red, or purple; medium size.

Shrubland—Large, purple; red; fine for market purposes, all-purpose; hardy. Price 50c each.

Abundance—Early red; fine, large, suited for all purposes. Price 50c each.

Blue Dawson—Small but of high quality; old and new; juicy, juicy, hardy, heavy bearer, and one of the best market sorts.

Burkard—A little later than Abundance; bright red, with fine flavor; large, very good; hardy, prolific, young bearer, popular all around. Price 50c each.

Monarch—A large, late, purple plum; young and prolific bearer; a good shipper. Price 50c each.

Orange—One of the best for home use or market; golden yellow, flesh firm, excellent flavor, size medium. Price 75c each.

Champion—Large, good shape, somewhat like an apple, but very showy; rich; supematant qualities good, bears young. Price 75c each.

Prolifer—Not so large but a young, early bearer, and prolific; of good quality. Price of all quince trees—Large size, 3 to 4 feet, $1 each, ten for $9; medium size, 2 to 3 feet, 75c each, ten for $7.

SOUR CHERRIES.

These are the money-makers. Cherry orchards in Michigan have made some handsome profits the past few years, and will probably profit in the very near future with the population of the country. We have tried orchard cherries, and find that two are worth among the sour cherries to space in any orchard: Bing and Morello. Bing is a good, profitable sweet cherry, however.

Early Blenheim—Best early cherry, much like Morello, but an earlier bearing cherry; large, very showy and very dark red cherries Sells well on all markets.

Bing—Very large, dark red, firm, fine quality; trees are hardy and productive. Price each, $2.

Van Himbergen—Rich bright yellow cherry, excellent flavor. Ripes in June and generally liked. Size medium; large; large; wide; very popular. Price each $2.

Lambert—One of the largest of sweet cherries, dark red, firm, large, rich; tree rugged and a good grower. A good one. Price each, $2.

Napoleon—(Big Prussars)—This is a magnificent cherry. Large size, fine flavor, light colored with red cheek, very popular.

Windsor—Of Canadian origin, noted for its hardy, heavy, and abundant bearing. Cherry is large, dull red, always a money-maker. Price each, $2.

Price of Trees—Both sweet and sour cherries—are 50c each, 2 for 75c; 50c each, Stocky, 4 to 6 feet, 75c each, 10 for $7.50. Our trees are fine and must please you. Write us when interested in very large quantities.

The hardest and most abundant bearer of the different cherries is the Bing. The Montmorenci is the only one really worth setting. Good trees, $2 each.
APPLES

We are offering a well-assorted list of apple trees in one-, two-, and three-year stock, having a large supply of one-year and an exceptionally large supply of two-year trees. To those who want large trees for gardens or parks, we can saw them into three-year-old trees in a few well-assorted varieties. We recommend our one-year-old trees as well as our two-year-old trees. Our "New Oak Process" is Michigan-grown, and very smooth for Michigan trees, being grown in Michigan trees. Type of ground we have ever seen, whether from New York, Ohio, Missouri, or any other state that are sold by nursery companies.

Remember, that our trees are just as good, and many times better, than trees from Missouri or any other state that are sold by nursery companies.

A PLATE OF PRIZE-WINNING RED DELICIOUS. PRIZE AT THE NATIONAL APPLE

That use page after page of colored pictures trying to brag their trees into popularity. Their trees are raised from grown grafted to seedling root stocks and are in no way superior to any other trees raised in same manner, and in the long run are not so good as Michigan trees.

Price of varieties of apple and crabapple trees:
One-year trees, 1, 11-10, 4 to 8 feet, in small lots, 50c each, 10 of one kind, 55c, 100 for $5; second size, two-year, 75c, 3 to 5 feet, 50c each 10 of a kind for $4.50, 100 for $45.
One-year trees, 4-6 feet, each of a kind for $1.50, 100 for $12; three-foot trees the 10, 10 of a kind for $2.25; 2 to 3-foot trees 10 each, 10 of a kind 25c, 100, 25c. Three-year apple trees 70c each in a few varieties. It is very easy to have a long list of varieties. Most people make the mistake of too many varieties. We have offered only those of known value to the home orchardist and commercial grower.

Delicious (winter) — It is one of Stark's introductions. It is a winter apple. It is elongated in shape, bright red in color with a slightly yellow crimson stripe. Its flesh is firm, tender, juicy, and highly flavored. It is not a sweet apple nor is it sour; slightly acid and a good keeper. Trees are thrifty growers, healthy, and very young bearing, having the reputation of producing profitable crops at five years of age.

Snow Apple or Fameuse — This is a late fall and early winter variety, having an enviable reputation for high quality. It is medium size, red with splashes of yellow and the northern latitudes; medium to large in size, roundish and oblong, dark red. It is slightly acid and flavored with pretty sweetness; juicy, crisp flesh, rich and pleasing; tree healthy; fruit a good bearer and a marker leader.

Rhode Island Greening — Large, greenish yellow, tender, juicy, and rich, and a spreading tree of iner shape but an abundant bearer. Fruit a good keeper.

We have many other varieties of apples. Among them are Rambo Ben Davis, Golden Russet, Golden Delicious, Winesap, Empire Codling, Summercrisp, and some delicious Michigan Golden.

MICHIGAN DELICIOUS TOOK SWEEPSTAKES SHOW IN ST. LOUIS, MO. RECENTLY.

Duchess (summer) — Hardy, Russian; fruit is streaked with dull red over yellow; subacid flavor. One of the most valuable fall apples.

Jonathan (summer) — Pale yellow, fine flavor; tree moderate grower, good bearer. Should go into every family orchard.

Fall Pippin (late fall, early winter) — Large, rich yellow; good for eating and cooking; juicy and rich. A grand apple. Everyone likes it.

Grimes Golden (winter) — Best yellow apple grown. Highest quality; rich subacid with fair flavor; medium to large. Good seller.

Hubbardston (winter) — Large, striped yellow and red; juicy and fine; one of the best.

Jonathan (winter) — Brilliant, Flashing red, rich, acid flavor; medium, conical. Generally adaptable; very popular.

Rusk (winter) — Large and handsome; striped red over yellow.

Maiden Blush (fall) — Rather large, quite smooth; pale yellow with beautiful red cheeks; pleasant acid flavor.

McIntosh — One of the hardiest and best; medium size; reddish flesh; very tender, juicy, and refreshing; prolific bearer. Early winter.

Rome Beauty (winter) — Large, roundish, flesh white and tender with a mild, rich, delicious subacid flavor. Late bearing its only fault.

Wagener (winter) — Bears very young, fruit full, and large dark red and of good quality.

Tahiti Sweet — The best winter sweet apple. Yellow, good quality, excellent keeper, and tree a rank grower. A profitable variety.

Sweet Rome — Large pale yellow, ripening short time after harvest. One of the most popular and loved summer apples. Well known.

Baldwin (winter) — Large, bright red, very juicy; quality good, flavor fine; heavy producer. Does specially well east and north.

A FEW WORDS ABOUT OUR FARM AND NURSERY. BELIEVE IT WILL INTEREST YOU.

It is a well-known fact that our nursery friends who go to much pains in planning their plantations to tell you how good and wonderful is the fruit they have grown. So do we wish to tell in some modest way how about our plants and our nursery stock. Everyone knows it is very instructive insomuch that it would tell you new things about how to proceed in the right manner toward the production of "The Prestige Strain" of VICTORY PLANTS.

To start you off we have cleared from virgin soil about one-third of the farm of 640 acres in the last six years, so we can claim with more truth than many concerns that we give new ground plants. Nearly 100 head of stock have been kept, 40 head being dairy cows. Slip stocks are being filled for our long 20 acres of corn. Every cornfield, orchard, potato field, or field from which strawberries are grown are a source or possibly to rye and rye, which are plowed under. A large number of nursery stock and farm crops. Hundreds of tons of concentrate feed is purchased and fed to our stock. Our wages and farms are known the country over as we work hard in the stables for stock. Besides straw, our trees and shrubs are purchased for feed, as we can not feed from stock much and keep half the farm growing for nursery work.

A very fine picture for our catalogue would be an enormous quantity of hardy, manure that is monthly brought to the land and that we are preparing to crop rotation for planting our stock.

Also, what a convincing picture a field of rye and rye which would make it hard to top for better stock. We look to the future with pictures that will show our success, our success, our success in the nursery business. As to making a worthwhile satisfaction, we have made a few of our customers who would really think that we are not giving them the true picture of these "Victory Crops.""
